Project Description

About and Information Architecture Root

About ClassCompass

Description

- Efficiently monitors student grades & provides quick updates on academic performance
- Helps identify students who may be struggling early on
- Offers visualizations to help teachers better understand performance trends and patterns

Focus Areas

- HTML, CSS, and graphics for page layout design
- JavaScript interactivity to improve user experience

Information Architecture:

Goals:

- Monitors student grades effectively
- Provides warnings and updates to professors when necessary
- Students are able to voice opinions

We value effective and efficient education. With this application, stress from both parties are reduced.

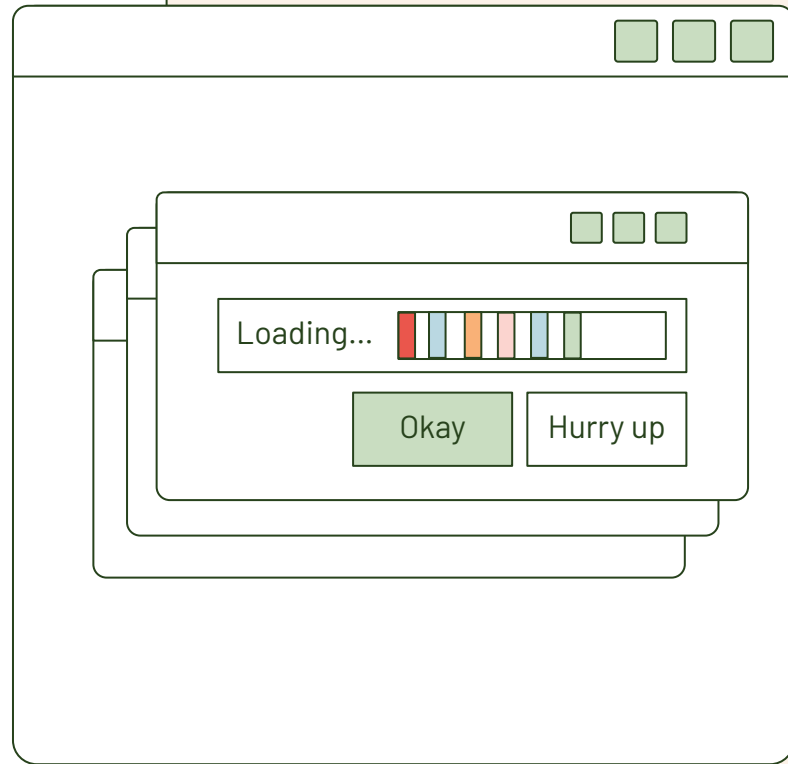

Root (team11)

 - Project plan
 - Final Write-up
- includes
 - config.inc.php
 - foot.inc.php
 - head.inc.php
 - init.inc.php
- landing_pages
 - analytics.html
 - class-overview.html
 - feedback-forum.html
 - individual-feedbacks.html
 - my-profile.html
 - settings.html
 - student-profile.html
- resources
 - css
 - images
 - jquery
 - js

03

Personas

Potential target audience 🙌

Persona #1: A college professor

Name: **Bobby Bobman**

Age: 67

Occupation: **Mathematics professor**

Courses Taught: Calculus I,

Multivariable Calculus,

Students per Class: 150 (large lectures)

Tech Comfort Level: Moderate

Goals

- Understand students' learning style to adapt his teaching methods
- Improve student comprehension and overall course outcomes

Pain Points

- Has a TERRIBLE Ratemyprofessors
- Half of his class always fails or withdraws and he doesn't know why
- Lacks tools to visualize where students begin struggling

Motivations

- Genuinely wants to improve student understanding and teaching effectiveness
- Wants student feedback in real time

Persona #2: A college professor

Name: **Rachel Peterson**

Age: 42

Occupation: **Associate Professor of Computer Science**

Courses Taught: Introduction to Computer Science, Database Systems

Students per Class: **150 (large lectures)**

Tech Comfort Level: Moderate

Goals

- Quickly spot struggling students and class-wide learning trends
- Save time on grading analysis and progress reporting
- Personalize student feedback

Pain Points

- LMS dashboards are limited and data is scattered
- Tracking 100+ students manually is unrealistic
- End-of-semester reporting is slow and tedious

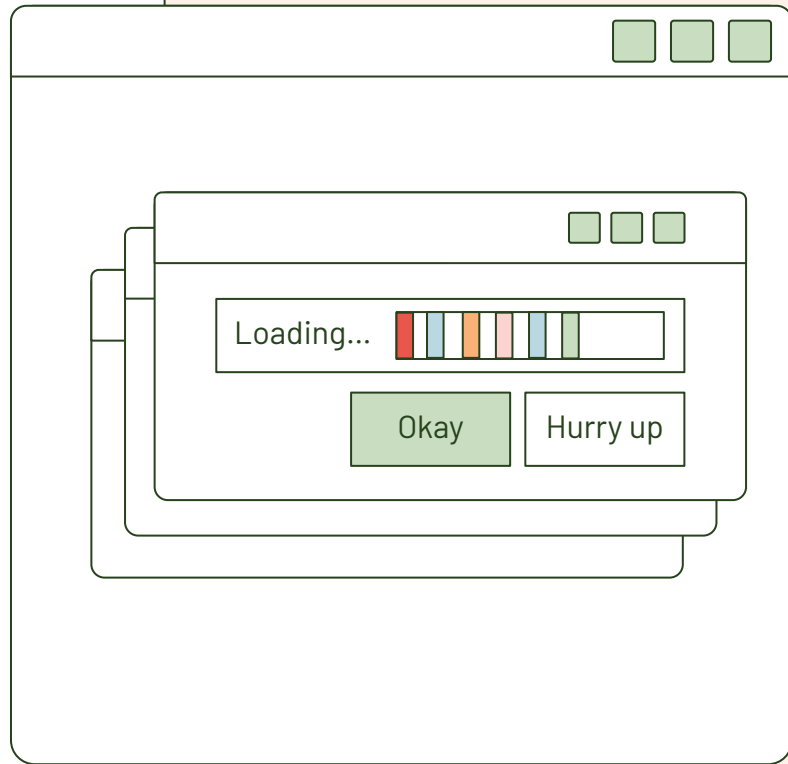

Motivations

- Wants to support student success proactively
- Values tools that save time and reduce admin burdens
- Appreciates clear, visual dashboards

Balsamiq

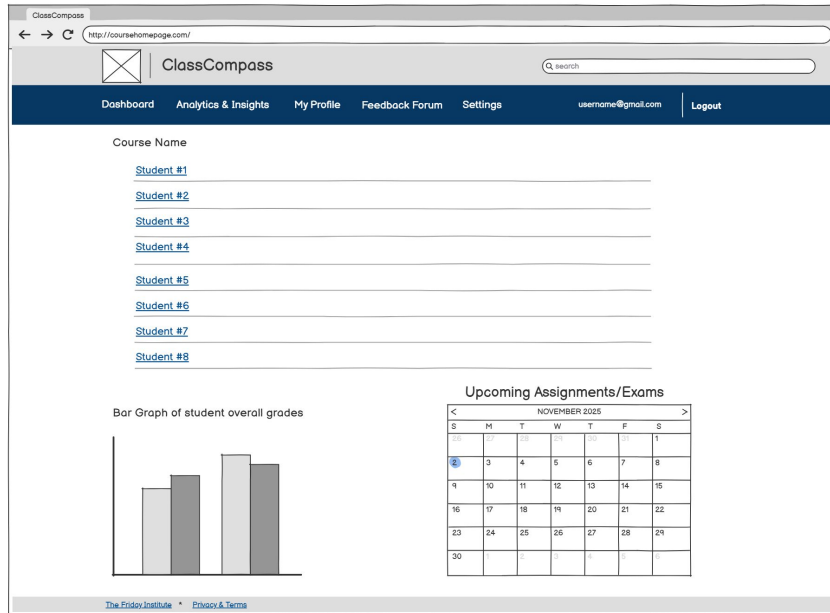

Our Website

Settings Page

Balsamiq

A Balsamiq wireframe of a settings page for a web application named 'ClassCompass'. The page is viewed in a browser window with the URL 'http://coursehomepage.com/'. The navigation bar includes links for Dashboard, Analytics & Insights, My Profile, Feedback Forum, and Settings, along with a user email and a Logout button. The 'Settings' section is divided into several categories: Appearance (Dark mode toggle, Background upload), Language (dropdown), Academic Preferences (checkboxes for Letter Grade, Percentage Grade, GPA, Score, Drop lowest grade, Category weights, Feedback forum, and Grader/GPA Calculator), Notifications & Alerts (Emails toggle, checkboxes for Weekly/Monthly reports, Grader/GPA updates, and Deadlines), and Privacy & Security (checkboxes for Download/report data and Consent & Data Policy). A 'Delete account' link is located at the bottom of the settings section. The footer contains links for 'The Friday Institute' and 'Privacy & Terms'.

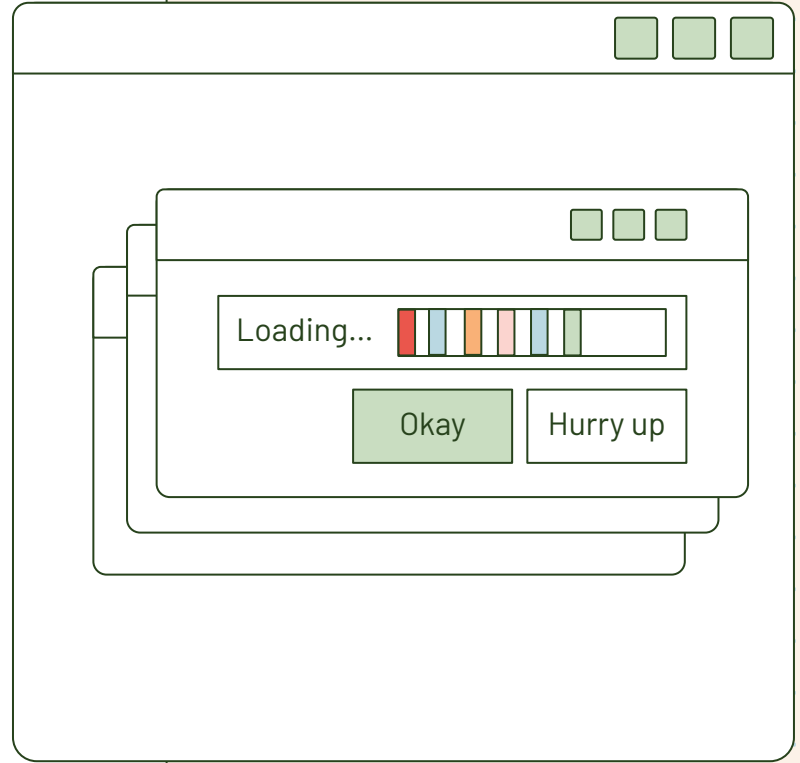

Our Website

A screenshot of the actual website's settings page for 'ClassCompass'. The page features a dark blue header with the site logo and navigation links: Dashboard, Analytics & Insights, My Profile, Feedback Forum, and Settings. A search bar and user information (Jennifer Kearney, Logout) are on the right. The 'Settings' section is organized into several collapsible panels: Appearance (Dark mode toggle set to 'off', Background upload with 'Choose File', 'No file chosen', and 'Remove background' buttons), Language (dropdown set to 'English'), Academic Preferences (checkboxes for Letter Grade, Percentage Grade, GPA (4.0/5.0, custom), Score (A = 93, A- = 90, etc.), Drop lowest grade (the test, lab, etc.), Category weights (percent = 50%, lab = 25%, etc.), Feedback forum, and Grader/GPA Calculator), Notifications & Alerts (Emails toggle, checkboxes for Weekly/Monthly summary reports, Grader/GPA updates, and Deadlines), and Privacy & Security (checkboxes for Download/report data and Consent & Data Policy (terms and agreement)). A 'Save Changes' button is at the bottom of the settings section, and a 'Delete account' link is at the bottom of the page. The footer shows 'ClassCompass • The Navigators'.

06

Conclusion

Difficulties + Future Implementations

Conclusion

Challenges

- Difficulties with PHP
- Pivot from Area 5 (put real data in a database) since we weren't able to find an API to provide us with the data

Future Implementations / What We Can Improve On

- Parent and Student access/profiles
- Importing and exporting reports
- Functioning search bar to look up specific students
- Having visual graphs to make data analysis easier
- Settings (language, academic preferences, etc.)

Thank You!
